All Rights Reserved.

The information in this document is subject to change without prior notice in order to improve the reliability, design and function. It does not represent a commitment on the part of the manufacturer.

Under no circumstances will the manufacturer be liable for any direct, indirect, special, incidental, or consequential damages arising from the use or inability to use the product or documentation, even if advised of the possibility of such damages.

This document contains proprietary information protected by copyright. All rights are reserved. No part of this manual may be reproduced by any mechanical, electronic, or other means in any form without prior written permission of the manufacturer.

Declaration of Conformity

CE

The CE symbol on your product indicates that it is in compliance with the directives of the European Union (EU). A Certificate of Compliance is available by contacting Technical Support.

This product has passed the CE test for environmental specifications when shielded cables are used for external wiring. We recommend the use of shielded cables. This kind of cable is available from ARBOR. Please contact your local supplier for ordering information.

This product has passed the CE test for environmental specifications. Test conditions for passing included the equipment being operated within an industrial enclosure. In order to protect the product from being damaged by ESD (Electrostatic Discharge) and EMI leakage, we strongly recommend the use of CE-compliant industrial enclosure products.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

FCC Class A

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1)This device may not cause harmful interference, and
- (2)This device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

RoHS

ARBOR Technology Corp. certifies that all components in its products are in compliance and conform to the European Union's Restriction of Use of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive 2002/95/EC.

The above mentioned directive was published on 2/13/2003. The main purpose of the directive is to prohibit the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE) in electrical and electronic products. Member states of the EU are to enforce by 7/1/2006.

ARBOR Technology Corp. hereby states that the listed products do not contain unintentional additions of lead, mercury, hex chrome, PBB or PBDB that exceed a maximum concentration value of 0.1% by weight or for cadmium exceed 0.01% by weight, per homogenous material. Homogenous material is defined as a substance or mixture of substances with uniform composition (such as solders, resins, plating, etc.). Lead-free solder is used for all terminations (Sn(96-96.5%), Ag(3.0-3.5%) and Cu(0.5%)).

SVHC / REACH

To minimize the environmental impact and take more responsibility to the earth we live, Arbor hereby confirms all products comply with the restriction of SVHC (Substances of Very High Concern) in (EC) 1907/2006 (REACH --Registration, Evaluation, Authorization, and Restriction of Chemicals) regulated by the European Union.

All substances listed in SVHC < 0.1 % by weight (1000 ppm)

Warning

Single Board Computers and their components contain very delicate Integrated Circuits (IC). To protect the Single Board Computer and its components against damage from static electricity, you should always follow the following precautions when handling it :

1. Disconnect your Single Board Computer from the power source when you want to work on the inside.
2. Hold the board by the edges and try not to touch the IC chips, leads or circuitry.
3. Use a grounded wrist strap when handling computer components.
4. Place components on a grounded antistatic pad or on the bag that comes with the Single Board Computer, whenever components are separated from the system.

Replacing the Lithium Battery

Incorrect replacement of the lithium battery may lead to a risk of explosion.

The lithium battery must be replaced with an identical battery or a battery type recommended by the manufacturer.

Do not throw lithium batteries into the trash-can. It must be disposed of in accordance with local regulations concerning special waste.

Technical Support

If you have any technical difficulties, please consult the user's manual first at:

<http://www.arbor-technology.com>

Please do not hesitate to call or e-mail our customer service when you still cannot find out the answer.

Warranty

This product is warranted to be in good working order for a period of two years from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster.

Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, or inability to use this product. Vendor will not be liable for any claim made by any other related party.

Vendors disclaim all other warranties, either expressed or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the hardware, the accompanying product's manual(s) and written materials, and any accompanying hardware. This limited warranty gives you specific legal rights.

Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.

Chapter 1

Introduction

1.1 The Product

The EmCOMe-i93U0/EmCOMe-i94U0 is a space-conscious CPU board of 95 mm x 95 mm to take up only small footprint in your system. By the architecture of Type 6, the board has two high-performance connectors to promise stable data passing rate. The soldered onboard 13th Generation Intel® Core™ processor, along with integrated Intel® Graphics chipset, bring LVDS, and DDI solution for most monitors or LCD video panels.

For system configuration, the board is supported by AMI UEFI BIOS.

EmCOMe-i93U0/EmCOMe-i94U0 is an ideal choice for some demanding industrial control and data communications by its significant processing performance, low power consumption and these features:

- **EmCOMe-i93U0:** Soldered onboard 12th Generation Intel® Alder Lake Core™ i7-1265UE / i5-1245UE / i3-1215UE / Celeron7305E processor
- **EmCOMe-i94U0:** Soldered onboard 13th Generation Intel® Raptor Lake Core™ i7-1365UE / i5-1335UE / i3-1315UE / U300E processor
- Up to 6x Performance core + 8x Efficient core and up to 96x graphic execution units
- Dual channel DDR5 memory up to 64GB, 4800MT/s
- Support Max 4 independent displays
- 8.5V~20V Wide Range Voltage Input
- Wide Range Operating Temp.: -40 ~ 85°C

1.2 About This Manual

This user's manual provides general information and installation instructions about the product. This user's manual is intended for experienced users and integrators with hardware knowledge of personal computers. If you are not sure about any description in this booklet. Please consult your vendor before further handling.

1.3 Specifications

System	
CPU	<p>EmCOMe-i93U0: Soldered onboard 12th Generation Intel® Alder Lake Core™</p> <ul style="list-style-type: none"> - i7-1265UE 3.5GHz (E-core) / 4.7GHz (P-core) - i5-1245UE 3.3GHz (E-core) / 4.4GHz (P-core) - i3-1215UE 3.3GHz (E-core) / 4.4GHz (P-core) - Intel® Celeron 7305E 1.0GHz <p>EmCOMe-i94U0: Soldered onboard 13th Generation Intel® Raptor Lake Core™</p> <ul style="list-style-type: none"> - i7-1365UE 3.7GHz (E-core) / 4.9GHz (P-core) - i5-1335UE 3.4GHz (E-core) / 4.6GHz (P-core) - i3-1315UE 3.3GHz (E-core) / 4.5GHz (P-core) - U300E 3.2GHz (E-core) / 4.3GHz (P-core)
Memory	2 x DDR5 SO-DIMM 4800MHz up to 64GB
BIOS	AMI UEFI BIOS
TPM	Supports TPM 2.0
Watchdog Timer	1~255 levels reset
I/O Interface	
Storage	2 x SATA Gen3 ports
Serial Port	2 x UART ports (RX/TX only)
Others	I ² C, GPIO , SMBUS , LPC Interface
USB Port	8 x USB 2.0 ports 4 x USB 3.0 ports
Expansion Bus	2 x PClex4 lanes (or 1 x PClex8) 8 x PClex1 lanes (or 1 x PClex4 + 4 x PClex1)
Ethernet Chipset	1 x Intel® i226 series PCIe 2.5GbE Ethernet controller
Audio	Intel® High Definition Audio
Display	
Graphic Chipset	Integrated Intel® Iris Xe or UHD Graphics (Depends on CPU SKU)

Graphic Interface	1 x Dual Channel 24-bit LVDS (default) or eDP 1 x Analog RGB port 3 x DDI ports Supports Max. 4 independent display
Graphic Resolution	VGA : up to 1920x1200 @ 60Hz DVI : up to 1920x1200 @ 60Hz LVDS: up to 1920x1200 @ 60Hz (dual channel 24-bit) DP: up to 3840x2160 @ 60Hz
OS Support	
Microsoft	Windows 10 64-bit / Windows 11 64-bit
Linux	Ubuntu
Mechanical & Environmental	
Power Requirement	8.5V ~ 20V wide range voltage input, +5VSB
Power Consumption	2.1A@12V 1.3A@20V (i7-1265UE/i7-1365UE CPU Module only)
Operating Temp.	-40 ~ 85°C (-40 ~ 185°F)
Operating Humidity	10 ~ 95% @ 85°C (non-condensing)
Dimensions (L x W)	95 x 95 mm (3.7" x 3.7")

1.4 Inside the Package

Before you begin installing your single board, please make sure that the following materials have been shipped:

1 x EmCOMe-i93U0 or EmCOMe-i94U0 COM Express CPU Module

1 x Quick Installation Guide

If any of the above items is damaged or missing, contact your vendor immediately.

1.5 Ordering Information

EmCOMe-i93U0-WT-1265UE	12 th Gen. Intel® Core™ i7-1265UE WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i93U0-WT-1245UE	12 th Gen. Intel® Core™ i5-1245UE WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i93U0-WT-1215UE	12 th Gen. Intel® Core™ i3-1215UE WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i93U0-WT-7305E	12 th Gen. Intel® Celeron 7305E WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i94U0-WT-1365URE	13 th Gen. Intel® Core™ i7-1365URE WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i94U0-WT-1365UE	13 th Gen. Intel® Core™ i7-1365UE WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i94U0-WT-1335UE	13 th Gen. Intel® Core™ i5-1335UE WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i94U0-WT-1315UE	13 th Gen. Intel® Core™ i3-1315UE WT COMe Compact Type 6 CPU Module, -40 ~ 85°C
EmCOMe-i94U0-WT-U300E	13 th Gen. Intel® U300E WT COMe Compact Type 6 CPU Module, -40 ~ 85°C

1.5.1 Optional Accessories

HS-93U0-C1	Heat sink with Fan (95x95x36.5mm)
HS-93U0-F1-T	Heat spreader, threaded standoffs (bore hole) (95x95x11mm)
HS-93U0-F1-NT	Heat spreader, non-threaded standoffs (bore hole) (95x95x11mm)
PBE-1705	COM Express® Type 6 evaluation carrier board (ATX form factor)
CBK-03-1705-00	Cable kit 1 x SATA cable 2 x COM Flat cables

Driver Installation

To install the drivers, please visit our website at www.arbor-technology.com and download the driver pack from the product page.

This page is intentionally left blank.

Chapter 2

Board Overview

2.1 What is “COM Express®”?

With more and more demands on small and embedded industrial boards, a multi-functional COM (Computer-on-Module) surfaces as a great solution.

COM Express® supports seven pin-out types applying to Basic and Extended form factors:

Module Type 1 and 10 support single connector with two rows (220 pins).

Module Type 2, 3, 4, 5 and 6 support two connectors with four rows (440 pins). EmCOMe-i94U0 is a Type-6 module.

Difference between Standard Type 6 and EmCOMe-i93U0/EmCOMe-i94U0 is listed as below:

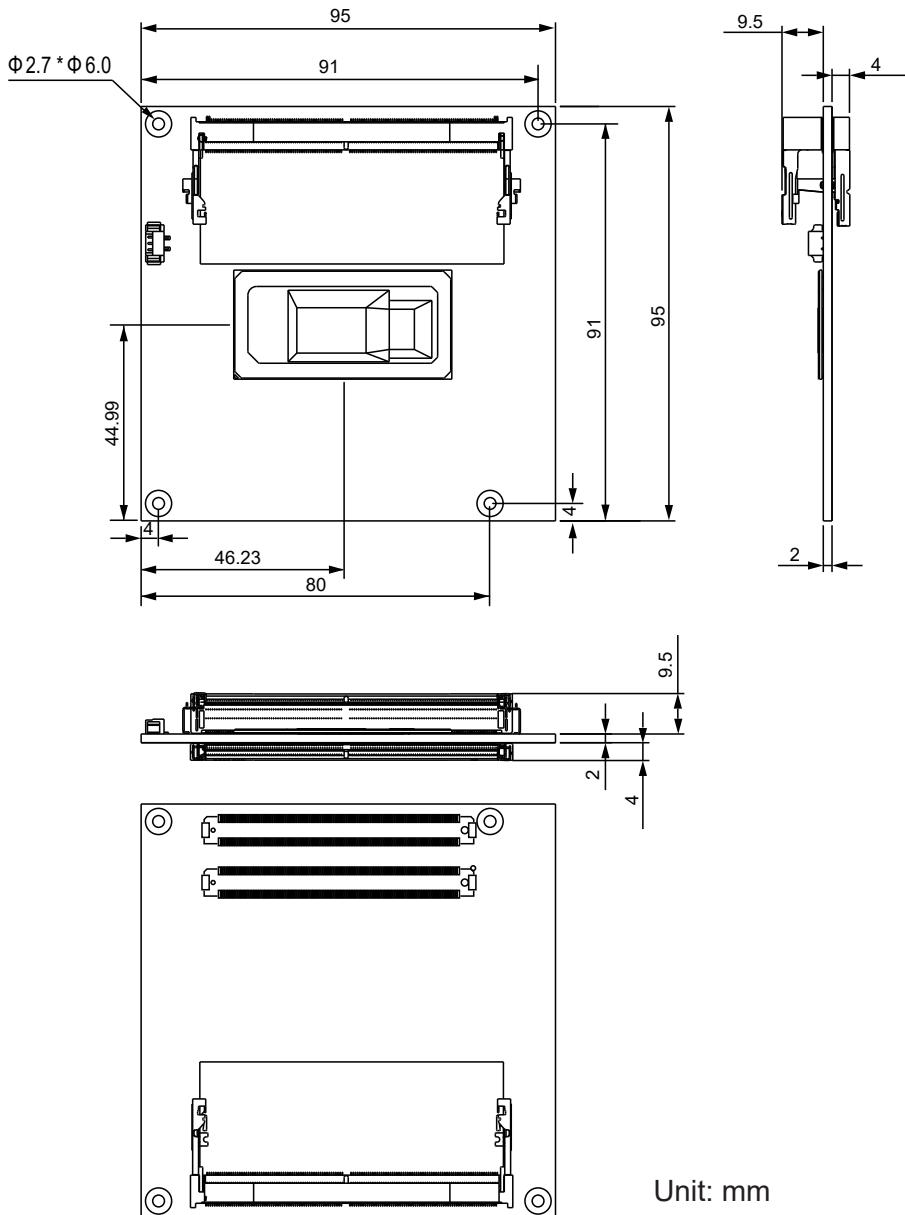

Module Type	Standard Type 6	EmCOMe-i93U0/ EmCOMe-i94U0
Connectors	2	2
Connector Rows	A, B, C, D	A, B, C, D
PCIe Lanes (Max)	24	16
LAN (Max)	1	1
Serial Ports (Max)	2	2
Digital Display I/F (Max)	3	3
USB 3.0 Ports (Max)	4	4

Row AB provides pins for PCI Express, SATA, LVDS, LCD channel, LPC bus, system and power management, VGA, LAN, and power and ground interfaces.

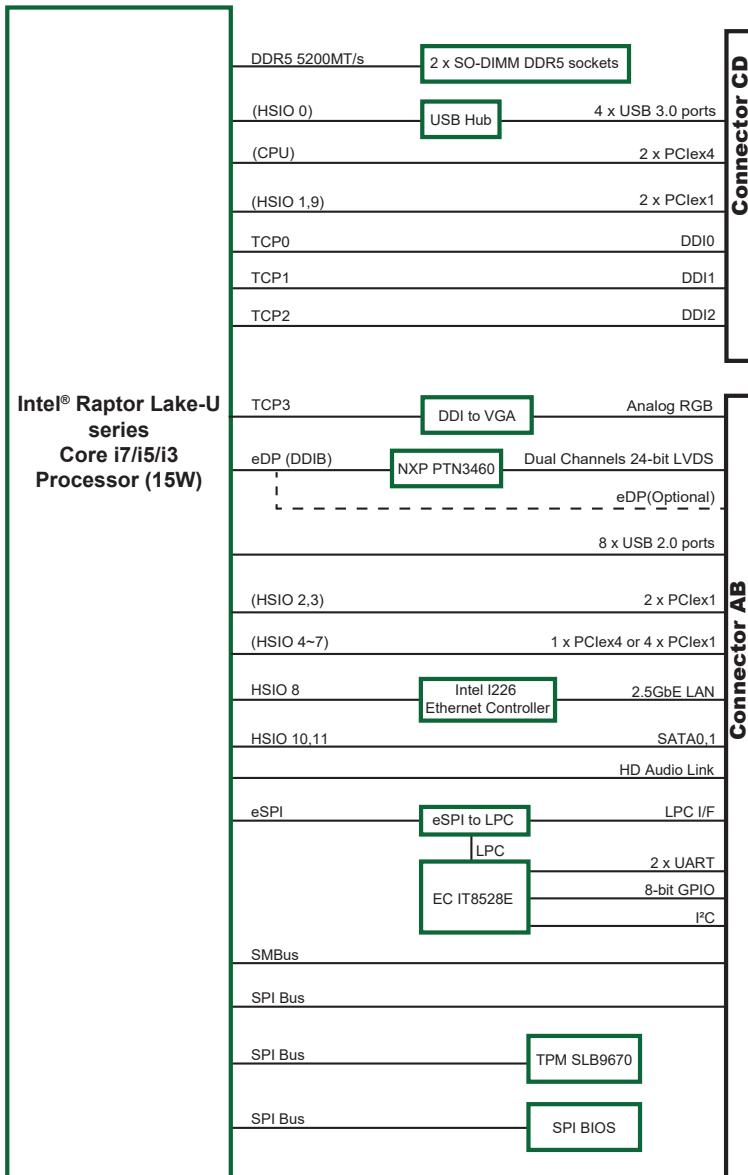

Row CD provides SDVO and legacy PCI signals next to additional PCI Express, LAN and power and ground signals. The COM are targeted at following applications:

- Retail & Advertising
- Medical
- Test & Measurement
- Gaming & Entertainment
- Industrial & Automation
- Military & Government
- Security

2.2 Board Dimensions

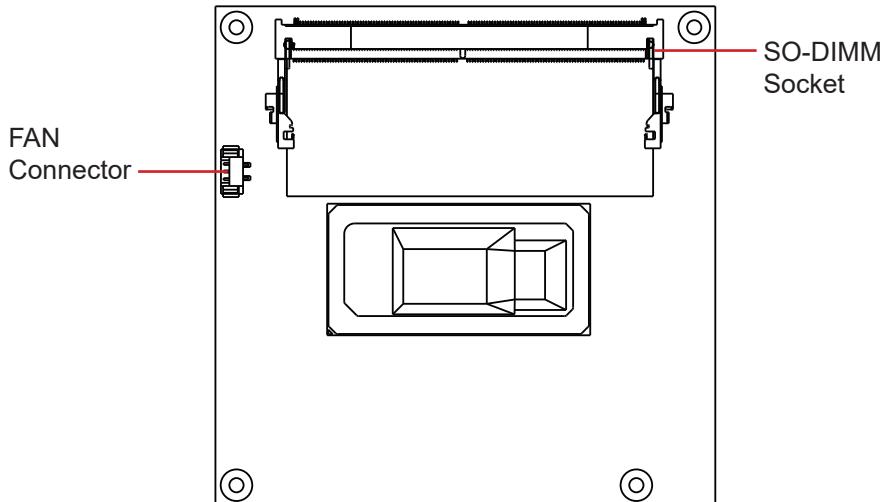

2.3 Block Diagram

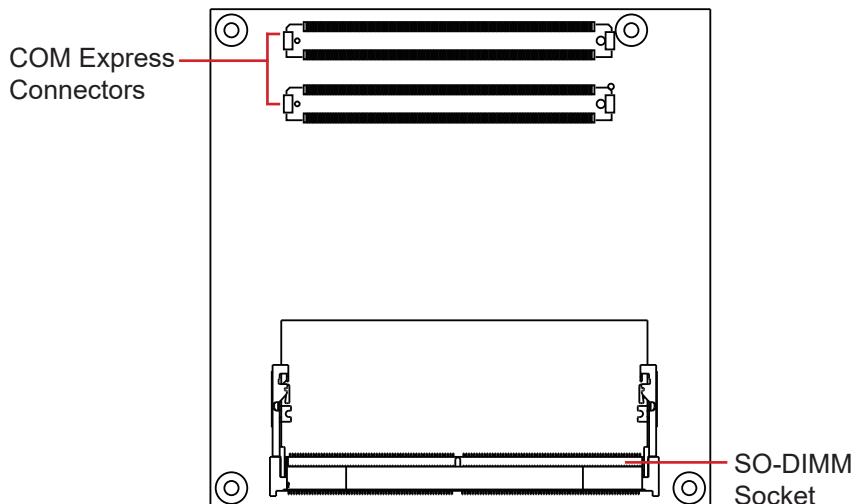

2.4 Connector Pin Definition

Being a most commonly-used Type 6, the EmCOMe-i93U0/EmCOMe-i94U0 features two board-to-board connectors on bottom side.

Chapter 3

Installation & Maintenance

3.1 Installing the CPU Module to Carrier Board

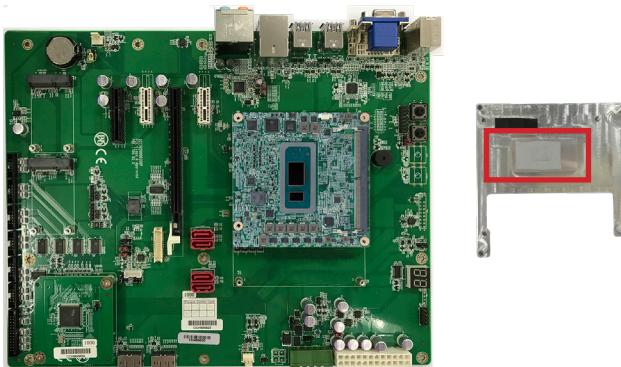

1. Mount the EmCOMe-i93U0 or EmCOMe-i94U0 into PBE-1705 via COM Express connectors as below; that is, COM Express AB to AB and CD to CD.

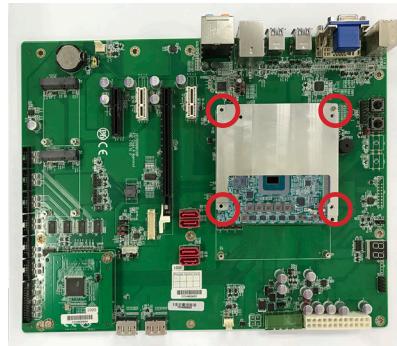

2. Install the optional heat spreader or heat sink with fan to the COM module.

For heat spreader

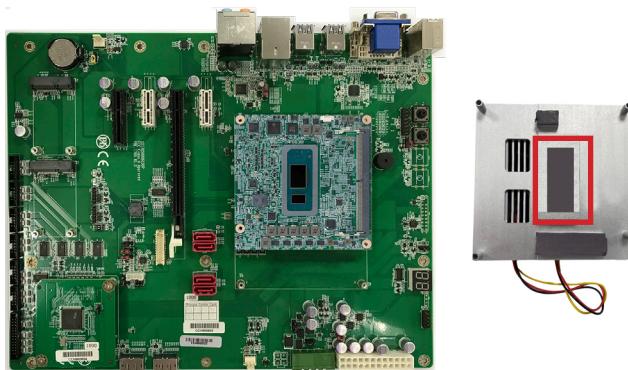

Apply thermal grease to the CPU area on the CPU module. Place the heat spreader over the CPU module and fasten the four screws to secure it in place.

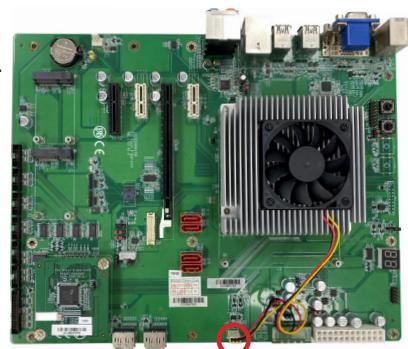

For heat sink with fan

Apply thermal grease to the CPU area on the CPU module. Place the heat sink over the CPU module and fasten the four screws to secure it in place.

Then connect the fan cable to the fan connector on the carrier board.

This page is intentionally left blank.

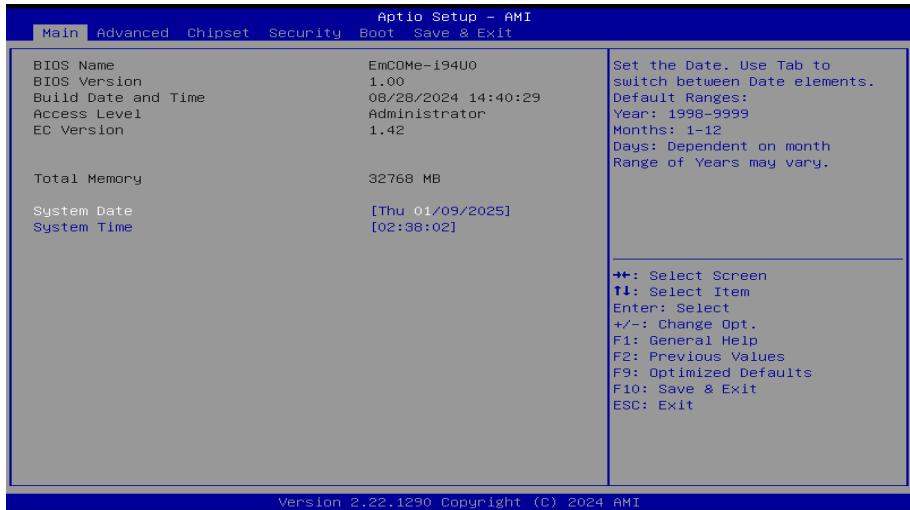

Chapter 4

BIOS

4.1 Main

The AMI BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS RAM of the system stores the Setup utility and configurations. When you turn on the computer, the AMI BIOS is immediately activated. To enter the BIOS SETUP UTILITY, press “**Delete**” once the power is turned on.

The **Main Setup** screen lists the following information:

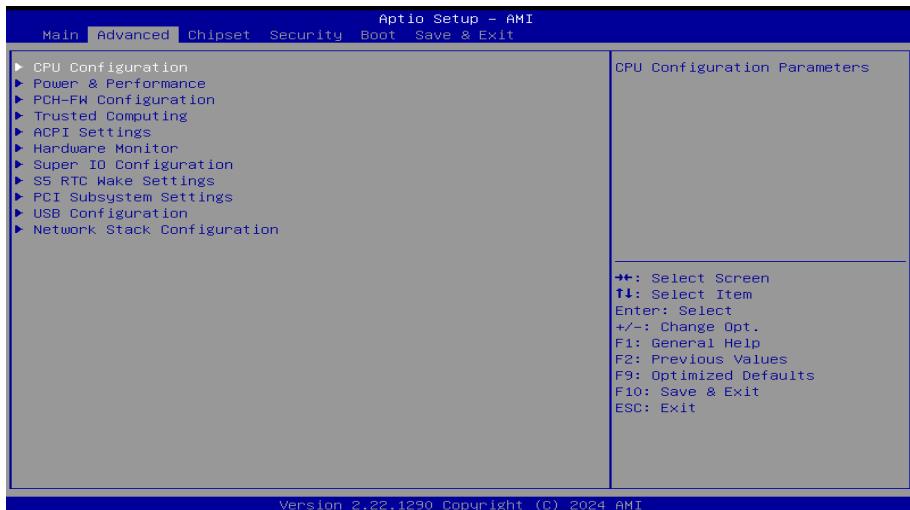

Setting	Description
System Date	<p>Set the system date. Use Tab to switch between Date elements. Note that the ‘Day’ automatically changes when you set the date.</p> <ul style="list-style-type: none"> ▶ The date format is: Day: Sun to Sat Month: 1 to 12 Date: 1 to 31 Year: 1998 to 9999
System Time	<p>Set the system time. Use Tab to switch between Time elements.</p> <ul style="list-style-type: none"> ▶ The time format is: Hour: 00 to 23 Minute: 00 to 59 Second: 00 to 59

Key Commands

BIOS Setup Utility is mainly a key-based navigation interface. Please refer to the following key command instructions for navigation process.

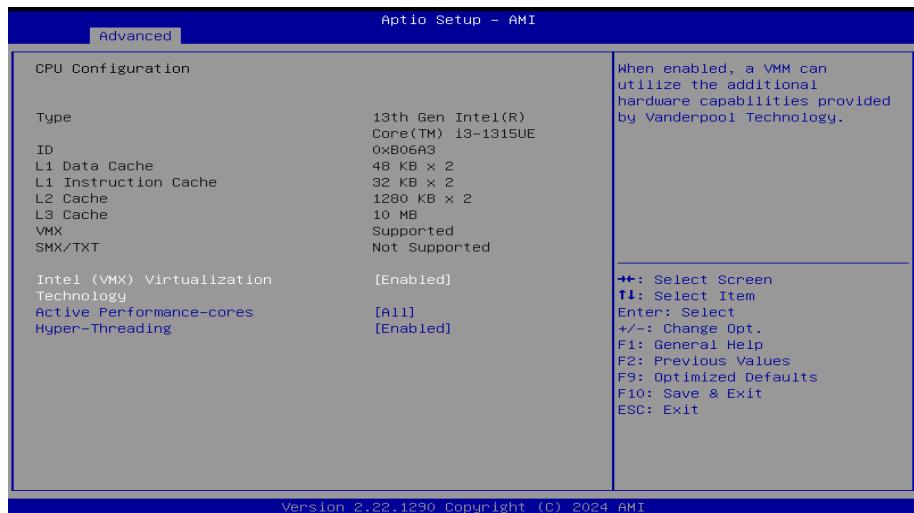

Keystroke	Function
◀ ▶	Move to highlight a particular configuration screen from the top menu bar / Move to highlight items on the screen
▼ ▲	Move to highlight previous/next item
Enter	Select and access a setup item/field
Esc	On the Main Menu – Quit the setup and not save changes into CMOS (a message screen will display and ask you to select “Yes” or “No” for exiting and discarding changes. Use “←” and “→” to select and press “Enter” to confirm) On the Sub Menu – Exit current page and return to main menu
Page Up / +	Increase the numeric value on a selected setup item / make change
Page Down / -	Decrease the numeric value on a selected setup item / make change
F1	Activate “General Help” screen
F10	Save the changes that have been made in the setup and exit. (a message screen will display and ask you to select “Yes” or “No” for exiting and saving changes. Use “←” and “→” to select and press “Enter” to confirm)

4.2 Advanced

Setting	Description
CPU Configuration	See 4.2.1 CPU Configuration on page 23
Power & Performance	See 4.2.2 Power & Performance on page 24
PCH-FW Configuration	See 4.2.3 PCH-FW Configuration on page 25
Trusted Computing	See 4.2.4 Trusted Computing on page 26
ACPI Settings	See 4.2.5 ACPI Settings on page 27
Hardware Monitor	See 4.2.6 Hardware Monitor on page 28
Super IO Configuration	See 4.2.7 Super IO Configuration on page 29
S5 RTC Wake Settings	See 4.2.8 S5 RTC Configuration on page 32
PCI Subsystem Settings	See 4.2.9 PCI Subsystem Settings on page 33
USB Configuration	See 4.2.10 USB Configuration on page 35
Network Stack Configuration	See 4.2.11 Network Stack Configuration on page 37

4.2.1 CPU Configuration

Version 2.22.1290 Copyright (C) 2024 AMI

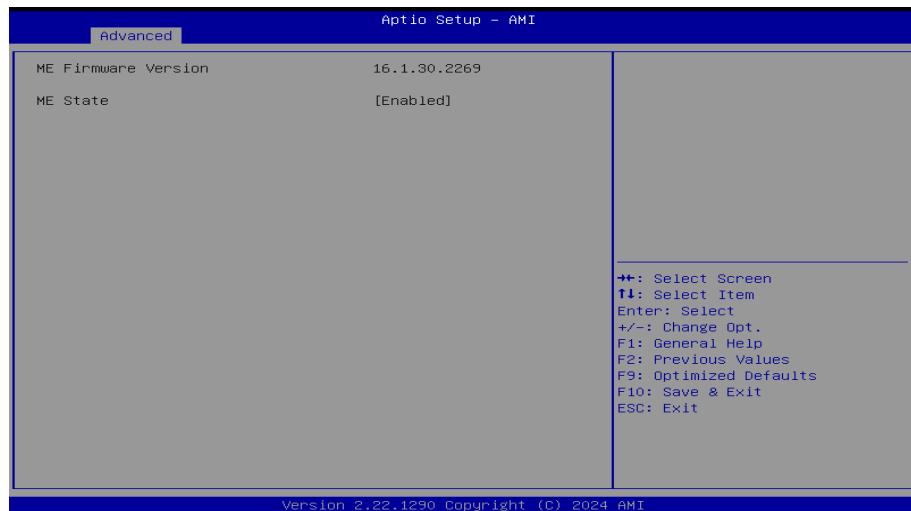

Setting	Description
Intel (VMX) Virtualization Technology	Enable or disable Intel virtualization technology. When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology. ▶ Options: Enabled (Default) or Disabled
Active Performance-Cores	Number of cores to enable in each processor package. ▶ Options: All (Default), 1
Hyper-Threading	Enabled (Default) for Windows and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized or Hyper-Threading Technology). When disabled only one thread per enabled core is enabled.

4.2.2 Power & Performance

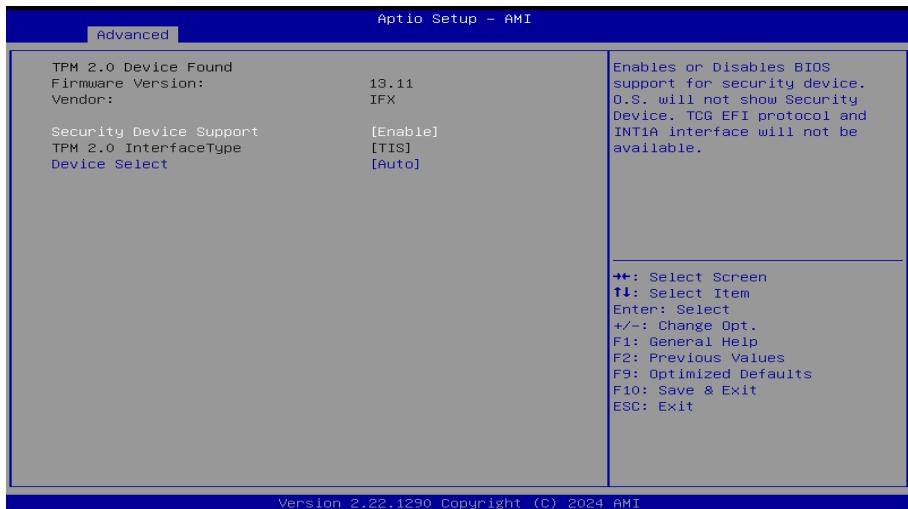

Setting	Description
CPU - Power Management Control	<p>CPU - Power Management Control Options</p> <p>Control CPU Power Management:</p> <ul style="list-style-type: none"> ▶ Options: Boot performance mode: Max Battery, Max Non-Turbo Performance, Turbo Performance (Default) ▶ Options: Intel(R) SpeedStep(tm) ▶ Options: Enabled (Default), Disabled Turbo Mode: Enable/Disable processor Turbo Mode. ▶ Options: Turbo mode: Enabled (Default), Disabled C States: Enable/Disable CPU C States ▶ Options: Disabled (Default), Enabled
GT - Power Management Control	<p>Maximum GT frequency: Maximum GT frequency limited by the user. Choose between 100MHz and 1200MHz.</p> <ul style="list-style-type: none"> ▶ Options: Default Max Frequency (Default), 100Mhz~1200Mhz Disable Turbo GT frequency: Enabled/Disabled GT Frequency. ▶ Options: Disabled (Default), Enabled

4.2.3 PCH-FW Configuration

Setting	Description
ME State	Enable (Default) / Disable ME state. When disabled, ME will be put into ME Temporariily Disabled Mode.

4.2.4 Trusted Computing

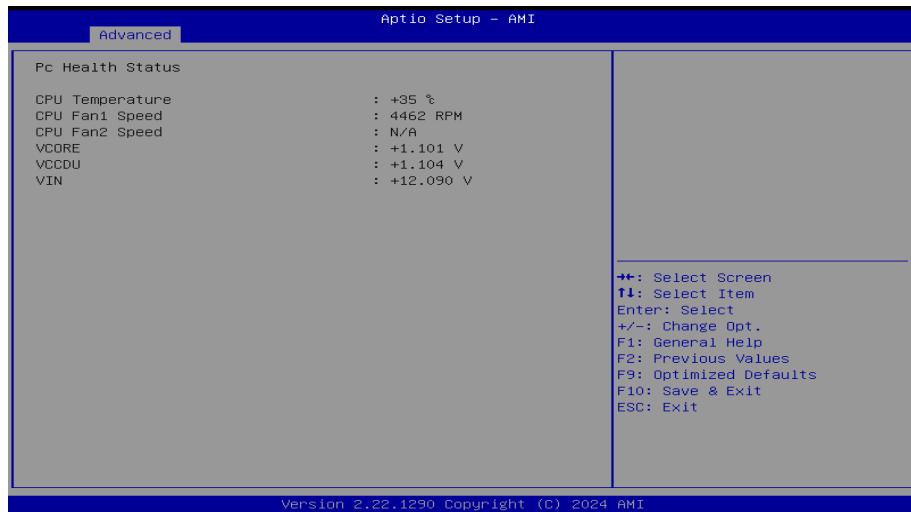

Setting	Description
Security Device Support	Enable (Default) or Disable BIOS support for security device. O.S. will not show Security Device. TCG EFI protocol and INT1A interface will not be available.
Device Select	Select the TPM device: Options: TPM 1.2 , TPM 2.0 and Auto (Default) ► TPM 1.2 will restrict support to TPM 1.2 devices ► TPM 2.0 will restrict support to TPM 2.0 devices ► Auto will support both with the default set to TPM 2.0 devices if not found., TPM 1.2 device will be enumerated.

4.2.5 ACPI Settings

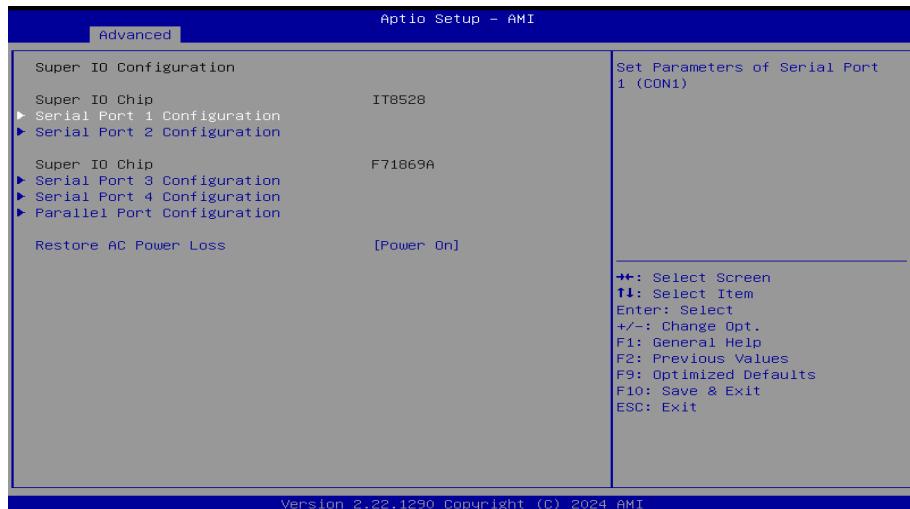

Setting	Description
Enable ACPI Auto Configuration	Enables or Disables BIOS ACPI Auto Configuration. (Disabled is the default)
Enable Hibernation	Enable (Default) or Disable System ability to Hibernate (OS/S4 Sleep State). This option may be not effective with some operating systems.

4.2.6 Hardware Monitor

Access this submenu to monitor the hardware status.

4.2.7 Super IO Configuration

Version 2.22.1290 Copyright (C) 2024 AMI

Setting	Description
Serial Port 1/2/3/4 & Parallel Port Configuration	See next page.
Restore AC Power Loss	<p>Specify what state to go to when power is re-applied after a power failure.</p> <ul style="list-style-type: none"> Options: Last State, Power On (Default) and Power Off

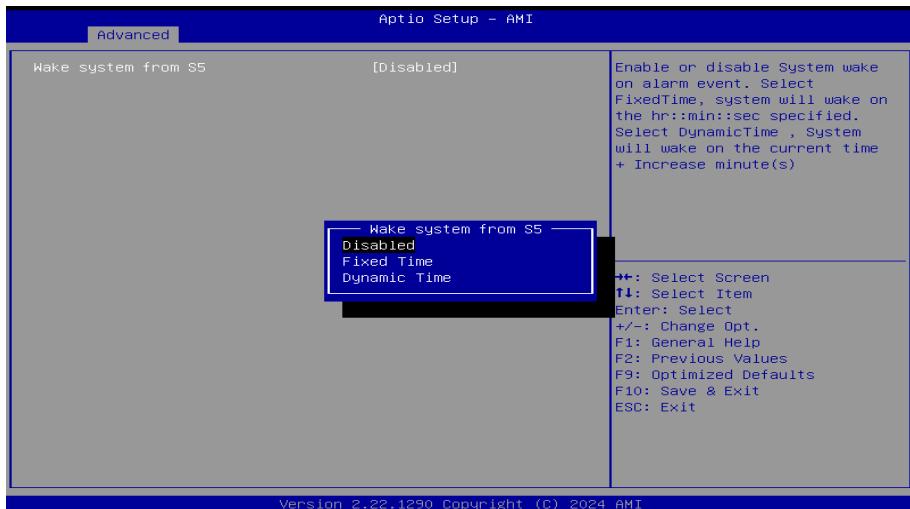

Serial Port 1/2/3/4 Configuration

Setting	Description
Serial Port	Enable (default) or Disable Serial Port (COM).
Change Settings	Select an optimal setting for Super IO device. ▶ Options for Serial Port 1: Auto IO=3F8h; IRQ=4 (Default) ; IO=3F8h; IRQ=3, 4, 7, 12 IO=2F8h; IRQ=3, 4, 7, 12 ▶ Options for Serial Port 2: Auto IO=2F8h; IRQ=3 (Default) IO=3F8h; IRQ=3, 4, 7, 12 IO=2F8h; IRQ=3, 4, 7, 12 ▶ Options for Serial Port 3: Auto IO=3E8h; IRQ=11 (Default) IO=3E8h; IRQ=7, 10, 11, 12 IO=2E8h; IRQ=7, 10, 11, 12 IO=2F0h; IRQ=7, 10, 11, 12 IO=2E0h; IRQ=7, 10, 11, 12 ▶ Options for Serial Port 4: Auto IO=2E8h; IRQ=10 (Default) IO=3E8h; IRQ=7, 10, 11, 12 IO=2E8h; IRQ=7, 10, 11, 12 IO=2F0h; IRQ=7, 10, 11, 12 IO=2E0h; IRQ=7, 10, 11, 12

Parallel Port Configuration

Setting	Description
Parallel Port	Enable (default) or Disable Parallel Port (LPT/LPTE).
Change Settings	Select an optimal setting for Super IO device. ► Options: Auto IO=378h; IRQ=7 (Default) IO=378h; IRQ=7, 10, 11, 12 IO=278h; IRQ=7, 10, 11, 12 IO=3BCh; IRQ=7, 10, 11, 12
Device Mode (only for Parallel Port Configuration)	Change the Printer Port mode. ► Options: STD Printer Mode (Default) SPP Mode EPP-1.9 and SPP Mode EPP-1.7 and SPP Mode ECP Mode ECP and EPP 1.9 Mode ECP and EPP 1.7 Mode.

4.2.8 S5 RTC Configuration

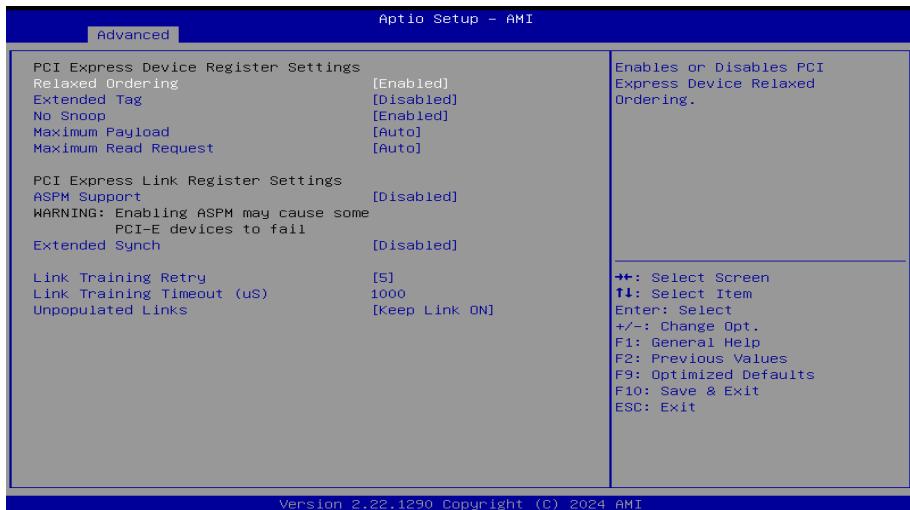

Setting	Description
Wake System from S5	<p>Enable or Disable (Default) system wake on alarm event.</p> <ul style="list-style-type: none"> ▶ Options available are: Disabled (Default): Fixed Time: System will wake on the hr::min::sec specified. DynamicTime: If selected, you need to set Wake up minute increase from 1 - 5. System will wake on the current time + increase minute(s).

4.2.9 PCI Subsystem Settings

Setting	Description
PCI Latency Timer	Value to be programmed into PCI Latency timer Register. ► Default: 32 PCI Bus Clocks
PCI-X Latency Timer	Value to be programmed into PCI Latency timer Register. ► Default: 64 PCI Bus Clocks
Above 4G Decoding	Enable (Default)/ Disable 64bit capable Devices to be Decoded in Above 4G Address Space (Only if System Supports 64 bit PCI Decoding).
PCI Express Setting	See next page.

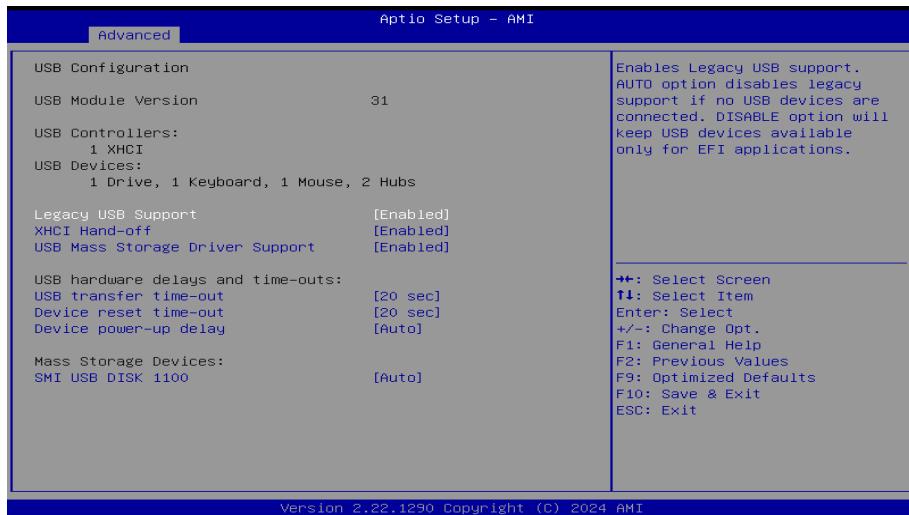

4.2.9.1 PCI Express Setting

Version 2.22.1290 Copyright (C) 2024 AMI

Setting	Description
Relaxed Ordering	Enable (Default) or Disable Relaxed Ordering.
Extended Tag	Enable or Disable (Default) Extended Tag.
No Snoop	Enable (Default)/ Disable No Snoop.
Maximum Payload	This item allows users to set the Maximum Payload.
Maximum Read Request	This item allows users to set the Maximum Read Request Size.
ASPM Support	Force L0s/Disable (Default) or Auto ASPM Support.
Extended Synch	Enable or Disable (Default) Extended Synch.
Link Training Retry	This item allows users to set the Link Training Retry.
Link Training Timeout (uS)	This item allows users to set the Link Training Timeout (uS)
Unpopulated Links	This item allows users to set the Unpopulated Links. (to Keep Link ON or Disable Link)

4.2.10 USB Configuration

Setting	Description
Legacy USB Support	Sets legacy USB support. ▶ Options: Enabled (default), Disabled and Auto . AUTO option disables legacy support if no USB devices are connected. Disable option will keep USB devices available only for EFI applications.
XHCI Hand-off	Enable (default) or Disable XHCI Hand-off. This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
USB Mass Storage Driver Support	Enable (default) or Disable USB Mass Storage Driver Support.
USB hardware delay and time-out	
USB Transfer time-out	Use this item to set the time-out value for control, bulk, and interrupt transfers. ▶ Options available are: 1 sec , 5 sec , 10 sec , 20 sec (default)

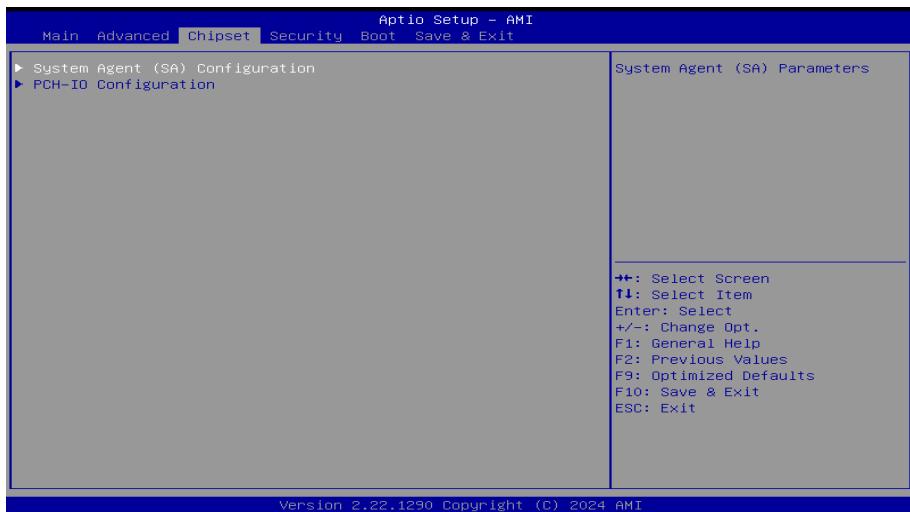

Device reset time-out	<p>Use this item to set USB mass storage device start unit command time-out.</p> <ul style="list-style-type: none"> ▶ Options available are: 10 sec, 20 sec (default), 30 sec, 40 sec
Device power-up delay	<p>Use this item to set maximum time the device will take before it properly reports itself to the host controller.</p> <ul style="list-style-type: none"> ▶ Options available are: <p>Auto (Default): 'Auto' uses default value: for a root port it is 100 ms, for a hub port the delay is taken from hub descriptor.</p> <p>Manual: Select Manual you can set value for the following sub-item: 'Device power-up delay in seconds', the delay range is from 1 to 40 seconds, in one second increments.</p>
Mass Storage Devices	
SMI USB DISK 1100	<p>Use this item to set mass device emulation type.</p> <ul style="list-style-type: none"> ▶ Options available are: <p>Auto (Default): 'Auto' enumerates devices according to their media format.</p> <p>CD-ROM: Optical drives are emulated as 'CD-ROM'.</p> <p>Floppy/Forced FDD/Hard Disk: Drives with no media will be emulated according to a drive type.</p>

4.2.11 Network Stack Configuration

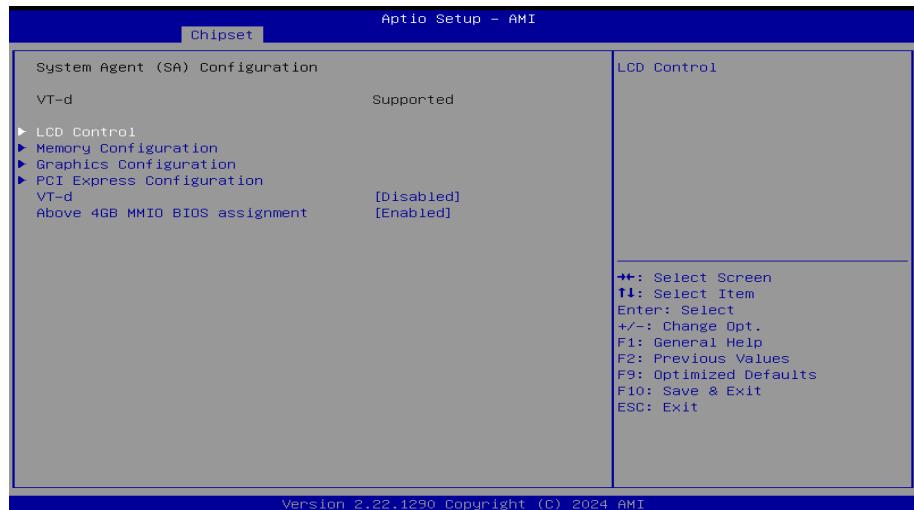

Setting	Description
Network Stack	Enables/disables UEFI network stack. ► Disabled is the default.

4.3 Chipset

Setting	Description
System Agent (SA) Configuration	See 4.3.1 System Agent (SA) Configuration on page 39
PCH-IO Configuration	See 4.3.2 PCH-IO Configuration on page 41

4.3.1 System Agent (SA) Configuration

Setting	Description
VT-d	Enable or Disable (default) VT-d capability.
Above 4GB MMIO BIOS assignment	Enable (default) or Disable Above 4GB MmemoryMapped BIOS assignment. This is enabled automatically when Aperture Size is set to 2048MB.
LCD Control	
Active LFP	Configuring LFP usage ▶ Options: No eDP (default) and eDP Port-A
Memory Configuration	
Memory Configuration	Access to view the memory configuration.
Graphics Configuration	
Primary Display	Select which of IGFX/PEG/PCI Graphics devices should be Primary Display or select HG for Hybrid Gfx. ▶ Options: Auto (default), IGFX , PEG Slot , PCH PCI , HG .

Apperture Size	Select the Aperture Size <ul style="list-style-type: none"> ▶ Options: 128MB, 256MB, 512MB, 1024MB <p>Note: Above 4GB MMIO BIOS assignment is automatically enabled when selecting > 2048MB aperture. To use this feature, please disable CSM Support.</p>
DVMT Pre-Allocated	Select DVMT 5.0 Pre-Allocated (Fixed) Graphics Memory size used by the Internal Graphics Device. <ul style="list-style-type: none"> ▶ Options: 0M, 32M, 64M, 96M, 128M, 160M, 4M, 8M, 12M, 16M, 20M, 24M, 28M, 32M/F7, 36M, 40M, 44M, 48M, 52M, 56M, 60M
DVMT Total Gfx Mem	Select DVMT 5.0 Total Graphic Memory size from 128MB to MAX used by the Internal Graphics Device . (256MB is the default)
PCI Express Configuration	
Fia Programming	Load Fia Configuration if Enabled for each root port. <ul style="list-style-type: none"> ▶ Options: Enabled, Disabled.
Compliance Test Mode	Enable when using Compliance Load Board. <ul style="list-style-type: none"> ▶ Options: Enabled, Disabled.
CDR Relock	Enable/Disable CDR Relock. <ul style="list-style-type: none"> ▶ Options: Enabled, Disabled.
Assertion on Link Down GPIOs	GPIO Assertion on Link Down. <ul style="list-style-type: none"> ▶ Options: Enabled, Disabled.
PCI Express Slot Selection	Select the PCIe M2 or CEMx4 slot. <ul style="list-style-type: none"> ▶ Options: M2, CEMx4 slot.
PCI Express Root Port 1/2/3	<p>PCI Express Root Port1/2/3: Control the PCI Express Root Port.</p> <ul style="list-style-type: none"> ▶ Options: Enabled, Disabled <p>ASPM: Set the ASPM level.</p> <ul style="list-style-type: none"> ▶ Options: Disabled, L0S, L1, L0sL1 <p>L1 Substates: PCI Express L1 Substates settings.</p> <ul style="list-style-type: none"> ▶ Options: Disabled, L1.1, L1.1&L1.2 <p>PCIe Speed: Configure PCIe Speed.</p> <ul style="list-style-type: none"> ▶ Options: Auto, Gen1, Gen2, Gen3, Gen4.

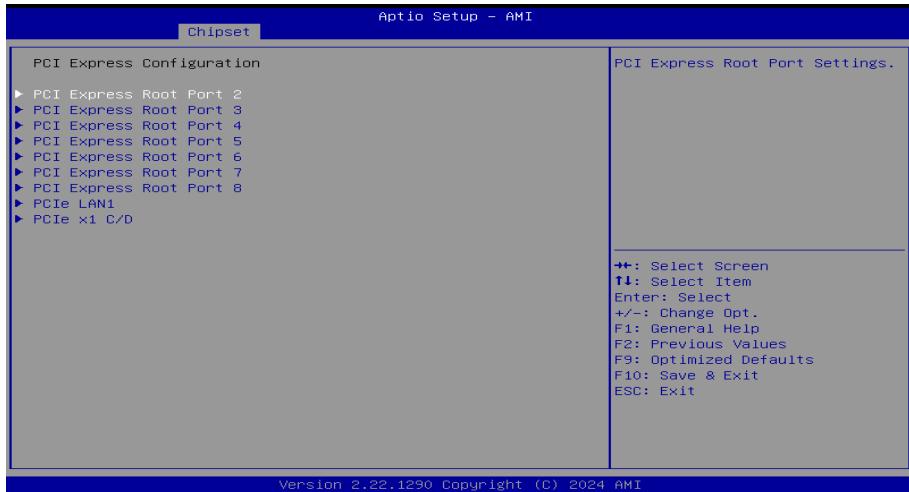

4.3.2 PCH-IO Configuration

Version 2.22.1290 Copyright (C) 2024 AMI

Setting	Description
PCI Express Configuration	See 4.3.2.1 PCI Express Configuration on page 42
SATA Configuration	See 4.3.2.2 SATA Configuration on page 44
USB Configuration	See 4.3.2.3 USB Configuration on page 45
HD Audio Configuration	See 4.3.2.4 HD Audio Configuration on page 46

4.3.2.1 PCI Express Configuration

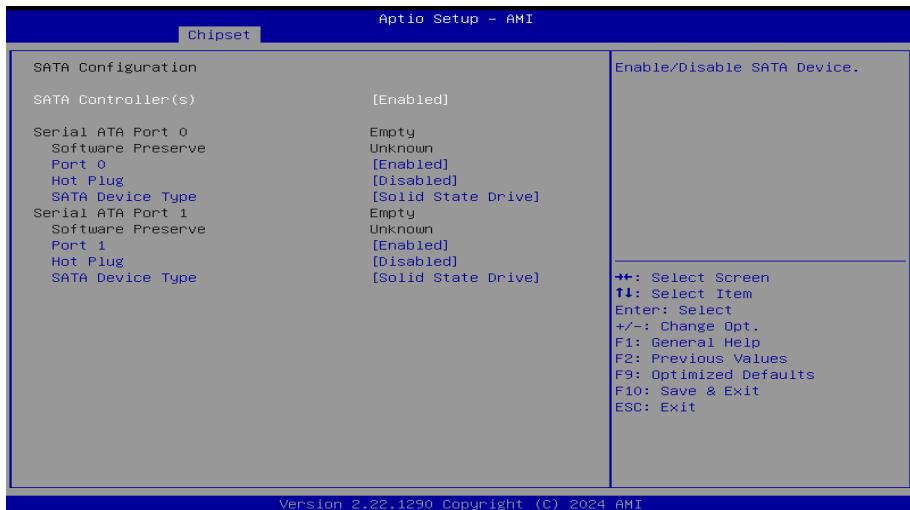

Setting	Description
PCI Express Root Port 2-8	<p>PCI Express Root Port 2-8: Control the PCI Express Root Port.</p> <ul style="list-style-type: none"> ▶ Options: Enabled, Disabled <p>ASPM: Set the ASPM level.</p> <ul style="list-style-type: none"> ▶ Options: Disabled, L1, Auto <p>L1 Substates: PCI Express L1 Substates settings.</p> <ul style="list-style-type: none"> ▶ Options: Disabled, L1.1, L1.1&L1.2 <p>PCIe Speed: Configure PCIe Speed.</p> <ul style="list-style-type: none"> ▶ Options: Auto, Gen1, Gen2, Gen3
PCIe LAN1	<p>PCIe LAN1: Control the PCI Express Root Port.</p> <ul style="list-style-type: none"> ▶ Options: Enabled, Disabled <p>ASPM: Set the ASPM level.</p> <ul style="list-style-type: none"> ▶ Options: Disabled, L1, Auto <p>L1 Substates: PCI Express L1 Substates settings.</p> <ul style="list-style-type: none"> ▶ Options: Disabled, L1.1, L1.1&L1.2 <p>PCIe Speed: Configure PCIe Speed.</p> <ul style="list-style-type: none"> ▶ Options: Auto, Gen1, Gen2, Gen3

PCIe x1 C/D

- PCIe x1 C/D:** Control the PCI Express Root Port.
 - ▶ Options: **Enabled, Disabled**
- ASPM:** Set the ASPM level.
 - ▶ Options: **Disabled, L1, Auto**
- L1 Substates:** PCI Express L1 Substates settings.
 - ▶ Options: **Disabled, L1.1, L1.1&L1.2**
- PCIe Speed:** Configure PCIe Speed.
 - ▶ Options: **Auto, Gen1, Gen2, Gen3**

4.3.2.2 SATA Configuration

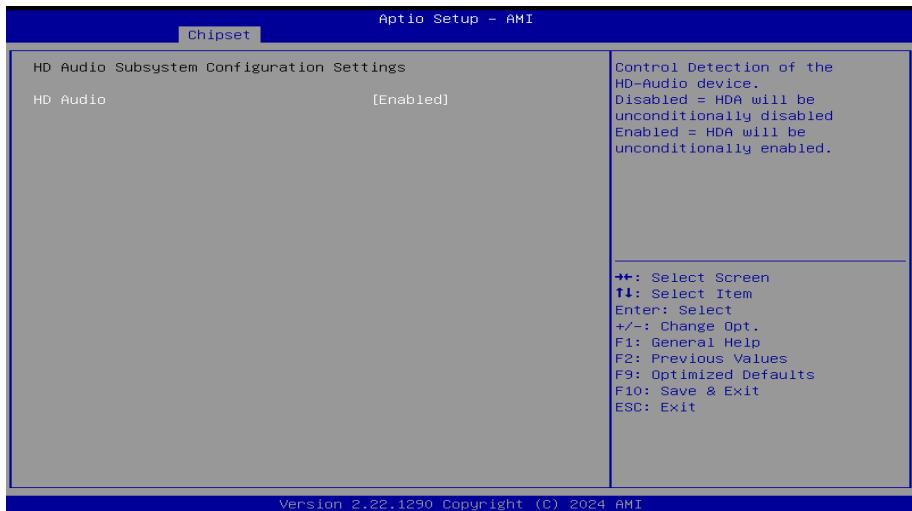

Setting	Description
SATA Controller(s)	Enable (default) or Disable SATA Device.
Port 0/1	Enable (default) or Disable SATA Port.
Hot Plug	Enable or Disable (default) the port as pluggable.
SATA Device Type	Identify the SATA port is connected to Solid State Drive or hard Disk Drive. ▶ Options: Hard Disk Drive and Solid State Drive (default).

4.3.2.3 USB Configuration

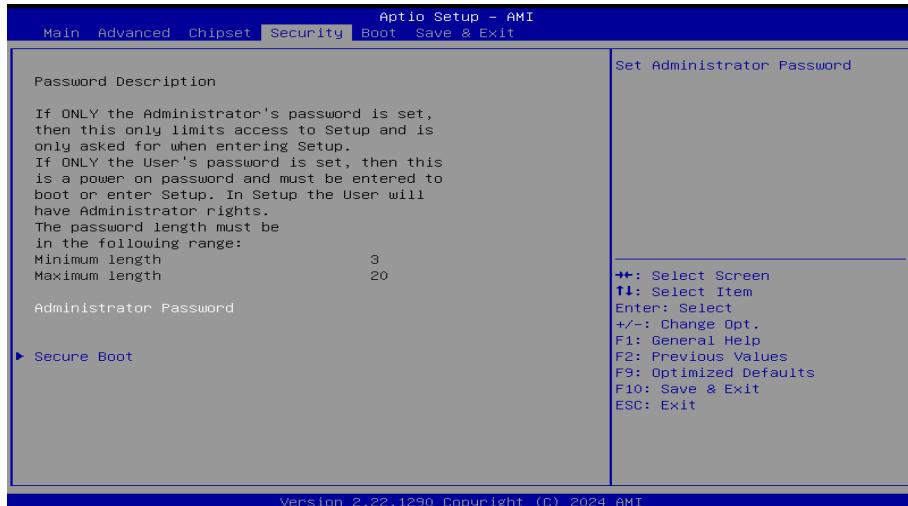

Setting	Description
USB Port Disable Override	<p>Selectively Enable/Disable (default) the corresponding USB port from reporting a Device Connection to the controller.</p> <ul style="list-style-type: none"> ▶ Options: Disable Link (default) and Select Per-Pin

4.3.2.4 HD Audio Configuration

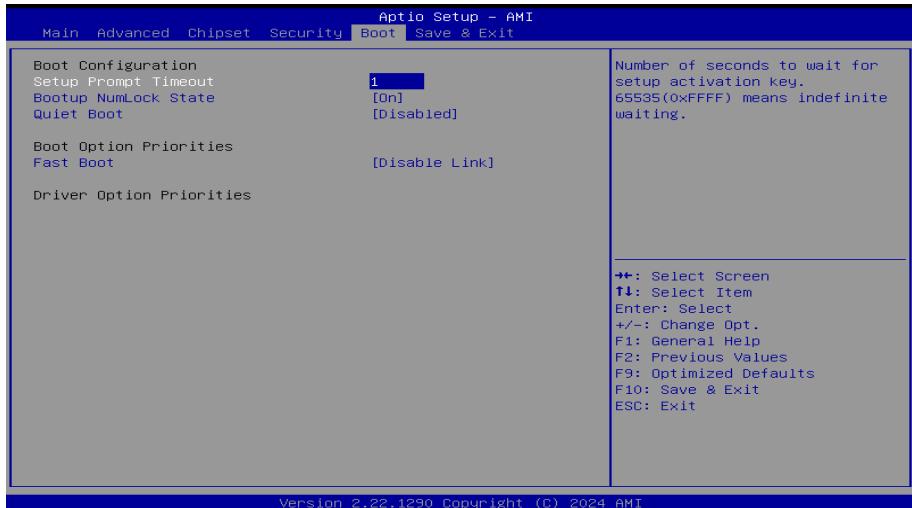

Setting	Description
HD Audio	<p>Control Detection of the HD-Audio device.</p> <p>► Options available are:</p> <p>Disabled: HDA will be unconditionally disabled</p> <p>Enabled (default): HDA will be unconditionally Enabled</p>

4.4 Security

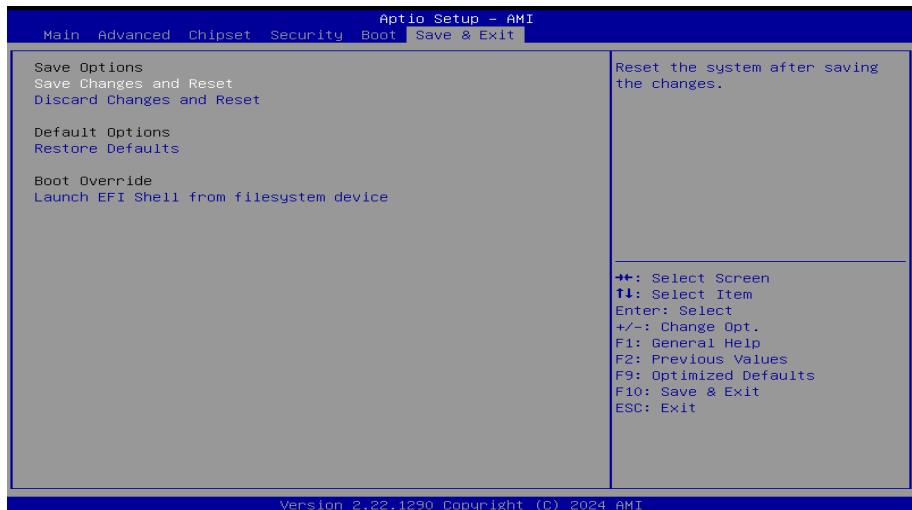

Setting	Description
Administrator Password	<p>To set up an administrator password:</p> <ol style="list-style-type: none"> 1. Select Administrator Password. The screen then pops up an Create New Password dialog. 2. Enter your desired password that is no less than 3 characters and no more than 20 characters. 3. Hit [Enter] key to submit.
Secure Boot menu	<p>Secure Boot Press [Enter] to make customized secure settings:</p> <ul style="list-style-type: none"> ▶ Options are: [Disabled] or [Enabled] <p>Secure Boot Mode Secure Boot feature is Active if Secure Boot is Enabled:</p> <ul style="list-style-type: none"> ▶ Options are: [Custom] or [Standard] <p>Key Management</p> <ul style="list-style-type: none"> ▶ This item enables expert users to modify Secure Boot Policy

4.5 Boot

Setting	Description
Setup Prompt Timeout	Use this item to set number of seconds to wait for setup activation key. 65535 (0xFFFF) means indefinite waiting.
Boot NumLock State	Select the keyboard NumLock state. ► Options: On (default) and Off .
Quiet Boot	Enable (default) or Disable Quiet Boot option.
Fast Boot	Enable or Disable (default) boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

4.6 Save & Exit

Setting	Description
Save Changes and Reset	Exit system setup after saving the changes. ► Enter the item and then a dialog box pops up: Save configuration and reset? (Yes/ No)
Discard Changes and Reset	Exit system setup without saving the changes. ► Enter the item and then a dialog box pops up: Reset without saving? (Yes/ No)
Restore Defaults	Restore/Load Default values for all the setup options. ► Enter the item and then a dialog box pops up: Load Optimized Defaults? (Yes/ No)
Launch EFI Shell from filesystem device	Attempts to launch EFI shell application (Shell.efi) from one of the available filesystem devices.

This page is intentionally left blank.

Appendix

Appendix A: Watchdog Timer (WDT) Setting

WDT is widely used for industry application to monitor the activity of CPU. Application software depends on its requirement to trigger WDT with adequate timer setting. Before WDT time out, the functional normal system will reload the WDT. The WDT never time out for a normal system. The WDT will not be reloaded by an abnormal system, then WDT will time out and reset the system automatically to avoid abnormal operation.

This board supports 255 levels watchdog timer by software programming I/O ports. Below are the source codes written in C, please take them as WDT application example.

```
/*-----*/
#include <math.h>
#include <stdio.h>
#include <dos.h>

int WDTCount;

int main(void)
{
    unsigned char          iCount;

    printf("WDT Times ( 1 ~ 255 ) : ");
    scanf("%d",&iCount);
    printf("\n");

    WDT_Start(iCount);

    return 0;
}

void WDT_Start(int iCount)
{
    outportb(0x66,0xBA);           /* Enable Watch Dog */
    delay(2000);

    WDTCount = iCount;
    outportb(0x62, WDTCount);      /* Number is Watch Dog Down count
number */
    delay(2000);

    outportb(0x62, 0x00);          /* Minute is 1 count unit by minute */
    /* Minute is 0 count unit by second */
```

```
}

void WDT_Stop(void)
{
    outportb(0x66,0xBB);           /* Disable Watch Dog */
}

void WDT_Clear(void)
{
    outportb(0x66,0xBA);           /* Enable Watch Dog */
    delay(2000);

    outportb(0x62, WDTCount);      /* Number is Watch Dog Down count
number */
    delay(2000);

    outportb(0x62, 0x00);          /* Minute is 1 count unit by minute */
    /* Minute is 0 count unit by second */}
```
