Chapter 1 - Introduction1
1.1. The Computer2
1.2. About this Manual3
1.3. Specifications
1.4. Inside the Package10
1.4.1. Optional Accessories10
1.4.2. Optional Configuration (CTOS* Kit)
Chapter 2 - System Overview
2.1. Dimensions
2.2. Take A Tour
2.2.1. FPC-5211-M4(FPC-5211-P6/2P4/2M4) Front View 18
2.2.2. FPC-5211-M4 Rear View
2.2.3. FPC-5211-P6 Rear View19
2.2.4. FPC-5211-2M4 Rear View
2.2.4. FPC-5211-2P4 Rear View
2.3. Driver Installation Notes
Chapter 3 - System Configuration
3.1. Board Layout22
3.2. Pin Headers and Connectors
3.3. PoE Management Utility (Only for FPC-5211-2M4/2P4 SKU)
3.4. FPC-5211 2M4/2P4 CAN BUS daughter board settings43
Chapter 4 - Installation and Maintenance
4.1. Install Hardware46
4.1.1. Open the Computer46
4.1.2. Install CPU
4.1.3. Install/Uninstall Memory Modules

#### Contents

4.1.4. Installing M.2 Storage Module	54
4.1.5. Installing Thermal Pad for RAM & NVMe SSD	55
4.1.6. Install Wi-Fi Module	56
4.1.7. Install Internal SATA Storage Device	61
4.1.8. Install MXM3.1 TYPE A/B GPU Cards	62
4.2. Wire DC-in Power Source	65
4.2.1. Automation Mode	65
4.2.2. Vehicle Application Mode	66
4.3 Wall Mounting	67
Chapter 5 - BIOS	
5.1. Main	72
5.2. Advanced	73
5.2.1. CPU Configuration	75
5.2.2. Power & Performance	76
5.2.3. Trusted Computing	78
5.2.4. ACPI Settings	79
5.2.5. Smart Settings	80
5.2.6. F81966 Super IO Configuration	81
5.2.7. Hardware Monitor	82
5.2.8. F81216SEC Super IO Configuration	83
5.2.9. S5 RTC Wake Settings	84
5.2.10. Serial Port Console Redirection	85
5.2.11. AMI Graphic Output Protocol Policy	
5.2.12. USB Configuration	87
5.2.13. Network Stack Configuration	89
5.2.14. NVME Configuration	90
5.3. Chipset	91
5.3.1. SATA Configuration	93
5.4. Security	94
5.5. Boot	96
5.6. Save & Exit	98
5.7. MEBx	99
Appendix	101
Appendix A. CAN BUS Test Procedures	102
Appendix B. 8-bit Opto-Isolated DI Signal Connections	105
B.1. Wet Contact DI with NPN / PNP connection	105
B.2. Dry Contact DI with NPN / PNP connection	106
Appendix C. 8-bit Opto-Isolated DO Signal Connections	107

#### **Copyright Notice**

All Rights Reserved.

The information in this document is subject to change without prior notice in order to improve the reliability, design and function. It does not represent a commitment on the part of the manufacturer.

Under no circumstances will the manufacturer be liable for any direct, indirect, special, incidental, or consequential damages arising from the use or inability to use the product or documentation, even if advised of the possibility of such damages.

This document contains proprietary information protected by copyright. All rights are reserved. No part of this document may be reproduced by any mechanical, electronic, or other means in any form without prior written permission of the manufacturer.

### Declaration of Conformity CE

The CE symbol on the computer indicates that it is in compliance with the directives of the Union European (EU). A Certificate of Compliance is available by contacting Technical Support.

This product has passed the CE test for environmental specifications when shielded cables are used for external wiring. We recommend the use of shielded cables. This kind of cable is available from ARBOR. Please contact your local supplier for ordering information.

#### Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

#### FCC Class A

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

#### NOTE:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

#### RoHS

ARBOR Technology Corp. certifies that all components in its products are in compliance and conform to the European Union's Restriction of Use of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive 2002/95/EC.

The above mentioned directive was published on 2/13/2003. The main purpose of the directive is to prohibit the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE) in electrical and electronic products. Member states of the EU are to enforce by 7/1/2006.

ARBOR Technology Corp. hereby states that the listed products do not contain unintentional additions of lead, mercury, hex chrome, PBB or PBDB that exceed a maximum concentration value of 0.1% by weight or for cadmium exceed 0.01% by weight, per homogenous material. Homogenous material is defined as a substance or mixture of substances with uniform composition (such as solders, resins, plating, etc.). Lead-free solder is used for all terminations (Sn(96-96.5%), Ag(3.0-3.5%) and Cu(0.5%)).

#### SVHC / REACH

To minimize the environmental impact and take more responsibility to the earth we live, Arbor hereby confirms all products comply with the restriction of SVHC (Substances of Very High Concern) in (EC) 1907/2006 (REACH --Registration, Evaluation, Authorization, and Restriction of Chemicals) regulated by the European Union.

All substances listed in SVHC < 0.1 % by weight (1000 ppm)

#### **Important Safety Instructions**

Read these safety instructions carefully

- 1. Read all cautions and warnings on the equipment.
- 2. Place this equipment on a reliable surface when installing. Dropping it or letting it fall may cause damage
- 3. Make sure the correct voltage is connected to the equipment.
- 4. For pluggable equipment, the socket outlet should be near the equipment and should be easily accessible.
- 5. Keep this equipment away from humidity.
- 6. The openings on the enclosure are for air convection and protect the equipment from overheating. DO NOT COVER THE OPENINGS.
- 7. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
- 8. Never pour any liquid into opening. This may cause fire or electrical shock.
- 9. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.
- 10. If one of the following situations arises, get the equipment checked by service personnel:
  - a. The power cord or plug is damaged.
  - b. Liquid has penetrated into the equipment.
  - c. The equipment has been exposed to moisture.
  - d. The equipment does not work well, or you cannot get it to work according to the user's manual.
  - e. The equipment has been dropped or damaged.
  - f. The equipment has obvious signs of breakage.
- 11. Keep this User's Manual for later reference.

#### Preface

#### Warning

The Box PC and its components contain very delicately Integrated Circuits (IC). To protect the Box PC and its components against damage caused by static electricity, you should always follow the precautions below when handling it:

- 1. Disconnect your Box PC from the power source when you want to work on the inside.
- 2. Use a grounded wrist strap when handling computer components.
- 3. Place components on a grounded antistatic pad or on the bag that came with the Box PC, whenever components are separated from the system.

#### **Replacing Lithium Battery**

Incorrect replacement of the lithium battery may lead to a risk of explosion.

The lithium battery must be replaced with an identical battery or a battery type recommended by the manufacturer.

Do not throw lithium batteries into the trash can. It must be disposed of in accordance with local regulations concerning special waste.

#### **Technical Support**

If you have any technical difficulties, please consult the user's manual first at: http://www.arbor-technology.com

Please do not hesitate to e-mail our customer service when you still cannot find out the answer.

E-mail: info@arbor.com.tw

#### Warranty

This product is warranted to be in good working order for a period of one year from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster.

Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, or inability to use this product. Vendor will not be liable for any claim made by any other related party.

Vendors disclaim all other warranties, either expressed or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the hardware, the accompanying product's manual(s) and written materials, and any accompanying hardware. This limited warranty gives you specific legal rights.

Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.

# Chapter 1 Introduction

#### 1.1. The Computer

#### FPC-5211-M4

- Fanless design (Embedded heat pipes cooling solution)
- 14<sup>th</sup> / 13<sup>th</sup> / 12<sup>th</sup> Gen Core<sup>™</sup> i9/i7/i5/i3 Processor (Raptor Lake-Refresh-S/ Raptor Lake-S/Alder Lake-S)
- Up to 60W GPU MXM module expansion
- 4 x 802.3af (15.4W) Gigabit PoE ports
- DP x 2 + HDMI x 1 and DVI x 1 (support 4 independent displays)
- Power on/off delay control / configurable ignition power control
- Supports TPM 2.0 and Time-Sensitive Networking (TSN)
- Two-mPCle for optional WiFi/3G/4G/GPS or I/O expansion supported
- Front-accessible I/O support
- 1 x M.2 B-Key for storage or 5G / LTE +1 x M.2 E-Key for WiFi / BT
- 1 x M.2 M-Key for NVMe SSD

#### FPC-5211-P6

- Fanless design ( Embedded heat pipes cooling solution)
- 14<sup>th</sup>/13<sup>th</sup>/12<sup>th</sup> Gen. Core<sup>™</sup> i9/i7/i5/i3 Processor (Raptor Lake-Refresh-S/ Raptor Lake-S/Alder Lake-S)
- Up to 60W GPU MXM module expansion
- 6x 802.3af (15.4W) Gigabit PoE ports
- DP x2 + HDMI x 1 and DVI x 1 (support 4 independent displays)
- Power on/off delay control / configurable ignition power control
- Supports TPM 2.0 and Time-Sensitive Networking (TSN)
- Two-mPCle for optional WiFi/3G/4G/GPS or I/O expansion supported
- Front-accessible I/O support
- 1 x M.2 B-Key for storage or 5G / LTE +1 x M.2 E-Key for WiFi / BT
- 1 x M.2 M-Key for NVMe SSD

#### FPC-5211-2M4(2P4)

- Fanless design ( Embedded heat pipes cooling solution)
- 14<sup>th</sup> / 13<sup>th</sup> / 12<sup>th</sup> Gen Core<sup>™</sup> i9/i7/i5/i3 Processor (Raptor Lake-Refresh-S/ Raptor Lake-S/Alder Lake-S)
- Up to 60W GPU MXM module expansion

- 802.3af (15.4W)/802.3at(25.5W) Gigabit PoE ports
- DP x2 + HDMI x 1 and DVI x 1 (support 4 independent displays)
- Power on/off delay control / configurable ignition power control
- Supports TPM 2.0 and Time-Sensitive Networking (TSN)
- Two-mPCIe for optional WiFi/3G/4G/GPS or I/O expansion supported
- Front-accessible I/O support
- 1 x M.2 B-Key for storage or 5G / LTE +1 x M.2 E-Key for WiFi / BT
- 1 x M.2 M-Key for NVMe SSD

#### 1.2. About this Manual

This manual is meant for the experienced users and integrators with hardware knowledge of personal computers. If you are not sure about the description herein, consult your vendor before further handling.

We recommend that you keep one copy of this manual for the quick reference for any necessary maintenance in the future. Thank you for choosing ARBOR products.

#### 1.3. Specifications

System	
CPU	Intel <sup>®</sup> 14 <sup>th</sup> / 13 <sup>th</sup> / 12 <sup>th</sup> generation Core <sup>™</sup> i9/i7/i5/i3 processor in LGA1700 socket ( Max 35W CPU)
Memory	2 x 262-pin DDR5 SO-DIMM sockets, supporting 4800 MHz SDRAM up to 64GB (ECC/ Non-ECC)
Chipset	Intel® R680E
Graphics	Integrated Intel <sup>®</sup> HD Graphics 770
ATA	2 x Serial ATA ports with 600MB/s HDD transfer rate
LAN Chipset	1 x Intel® WGI219LM GbE controller w/ iAMT 16.0 3 x Intel® I226 2.5G GbE controllers 2 x Intel® I210 GbE controllers for PoE 2 x Intel® I226 2.5G GbE controllers for PoE
Watchdog Timer	1~255 levels reset
ТРМ	Onboard TPM 2.0
I/O	

#### FPC-5211-M4

#### Introduction

Serial Port	2 x RS-232/422/485 configurable ports via DB-9 connectors (Default RS232,Switch via BIOS) 2 x RS-232 via DB-9 connectors
USB Port	8 x USB 3.2/ 2.0 ports
LAN	4 x RJ-45 connectors for GbE 4 x M12 X-coded connectors by 2 x Intel® I210(1GbE) + 2 x Intel® I225(2.5GbE) supports 802.3af POE
Video Port	2 x DP 1.4a from MXM module or Intel Graphics (Default Intel graphics switch via BIOS) 1 x HDMI 2.0b female conn. for Digital Video output
	1 x DVI-I female conn. for Digital / Analog video output
	*Support 4 independent displays
Digital I/O Port	1xDB15 conn.for 8 x digital input (Dry / Wet contact) with 2KV isolation
Digital #O Port	1 x DB15 connector for 8 x digital output with 2KV isolation
Audio	Mic-in/Line-out
	1 x MXM3.1 TYPE A/B GPU Slot (PCIe Gen5 x16) MXM A2000 support
Expansion Bus	WiFi/BT/3G/LTE/ GPS (PClex1+USB2.0, Full Size)
	1 x M.2 B key (2242/3052/2280) w/ (PClex2+USB3.0+SATA) interconnected with SIM for 5G / LTE or for storage (either one)
	1 x M.2 E key (2230) with PCIex1+USB2.0+CNVi) for Wireless
Environmental	
Operating Temp.	-20 ~ 50°C (-4 ~ 122°F), ambient w/ air flow -20 ~ 65°C (-4 ~ 149°F), ambient w/ air flow ( w/ External SMART FAN kit) *A2000 GPU 100% loading without throttling
Storage Temp.	-40 ~ 85°C (-40 ~ 185°F)
Operating Humidity	10 ~ 95% @ 65°C (non-condensing)
Vibration	5~500Hz 3G rms X,Y,Z axis w/SSD, according to IEC 60068-2-64
Shock	50 Grms, Half-sine 11 m sec. duration w/ SSD, according IEC60068-2-27
Qualification	
Certification	CE, FCC Class A, E mark
Power Requirement	
Main Power Input	DC 9~36V input (w/ 4-pin DC input terminal block) ( V+ ,V+, V-, V-)
Ignition Switch	2-pin teminal block: IGN, GND

Power Consumption	Max. 180W	
Storage	Storage	
	2 x 2.5" outside accessible drive bays	
Туре	1 x M.2 B key ( 2242/2280 ) w/ (PClex2+USB+ SATA ) for storage or LTE expansion ( either one)	
	1 x M.2 2280 M key supports 2242, 2280 devices (PCIe x4 & SATA signal, support boot up function)	
Mechanical		
Construction	Aluminum alloy	
Mounting	Wall-mount	
Weight	5.83 Kg ( 12.85lb)	
Dimensions (W x D x H)	285x230x 90mm (11.22" x9.05" x 3.54"), Fanless 285x230x110mm (11.22" x9.05" x 4.33"), w/ FAN	
OS Support		
Windows 10 IoT Enterprise 64-bit / Windows 11 IoT Enterprise 64-bit Linux (Ubuntu 20.04 )		
Ordering Information		
FPC-5211-M4	Edge AI GPU Computer Bare BOM, w/4x M12 PoEs	

#### FPC-5211-P6

System	
CPU	Intel <sup>®</sup> 14 <sup>th</sup> / 13 <sup>th</sup> / 12 <sup>th</sup> generation Core <sup>™</sup> i9/i7/i5/i3 processor in LGA1700 socket ( Max 35W CPU)
Memory	2 x 262-pin DDR5 SO-DIMM sockets, supporting 4800 MHz SDRAM up to 64GB (ECC/ Non-ECC)
Chipset	Intel® R680E

Introduction

#### 1.4. Inside the Package

Upon opening the package, carefully inspect the contents. If any of the items is missing or appears damaged, contact your local dealer or distributor. The package should contain the following items:

#### 1.4.1. Optional Accessories

The following items are normally optional, but some vendors may include them as a standard package, or some vendors may not carry all the items.

WMK-5210	Wall-mount kit for FPC-521x Series	
PAC-280W6C-MW	280W AC/DC adapter kit w/ 2-pin/3-pin/4-pin block	

#### 1.4.2. Optional Configuration (CTOS\* Kit)

Make the computer more tailored to your needs by selecting one or more components from the list below to be fabricated to the computer.

MXM-A2000-8G	MXM 3.1 Type A NVIDIA <sup>®</sup> Quadro <sup>®</sup> Embedded A2000_8GB GDDR6 60W TGP)	
MM-5C- 8G/16G/32G	DDR5-4800 8GB/16GB/32G SDRAM DIMM module	00,00

#### Introduction

WIFI-IN2550	Intel® AX200NGW M.2 Wi-Fi 6 module w/ 2 x 30cm internal wires	
ANT-H11	1 x 2dBi HSUPA antenna	1
ANT-D11	1 x WiFi dual-band 2.4G/5G antenna	1
Core™ i3-13100TE	Intel <sup>®</sup> 13 <sup>th</sup> Gen. Core <sup>™</sup> i3-13100TE processor, L3/12M, 2.4G	
Core™ i5-13500TE	Intel <sup>®</sup> 13 <sup>th</sup> Gen. Core <sup>™</sup> i5-13500TE processor, L3/24M, 1.3G	
Core™ i7-13700TE	Intel <sup>®</sup> 13 <sup>th</sup> Gen. Core <sup>™</sup> i7-13700TE processor, L3/30M, 1.1G	
Core™ i9-13900TE	Intel <sup>®</sup> 13 <sup>th</sup> Gen. Core <sup>™</sup> i9-13900TE processor, L3/36M, 1.0G	
Core™ i3-14100T	Intel <sup>®</sup> 14 <sup>th</sup> Gen. Core <sup>™</sup> i3-14100T processor, L3/12M, 2.7G	(intel)
Core™ i5-14500T	Intel <sup>®</sup> 14 <sup>th</sup> Gen. Core <sup>™</sup> i5-14500T processor, L3/24M, 1.7G	
Core™ i7-14700T	Intel <sup>®</sup> 14 <sup>th</sup> Gen. Core <sup>™</sup> i7-14700T processor, L3/33M, 1.3G	
Core™ i9-14900T	Intel <sup>®</sup> 14 <sup>th</sup> Gen. Core <sup>™</sup> i9-14900T processor, L3/36M, 1.1G	
EXFAN-8015	External SAMRT Fan kit ( 80 x 80 x 15mm, 4 pin Terminal Block Plug, Mounting Bracket, support Smart Fan Function)	

\*CTOS means Configure-to-Order Service.

# 3.3. PoE Management Utility (Only for FPC-5211-2M4/2P4 SKU)

Installing PoE Management Utility

ArborIO64-Setup.exe ArborIO64.dll PoELib.dll

PoEModule.exe

Step 1: Install ArborIO64-Setup.exe

Step 2: Copy ArborIO64.dll file to C:\Program Files (x86)\ArborIO64\ArborIO64.dll

Step 3: Run PoEModule.exe application

Note: Users are available to download PoE Management utility on our website at http://www.arbortechnology.com to monitor the PoE status.

# **POE Port Status**

# Installation and Maintenance

# 4.1. Install Hardware

The FPC-5211 Series is constructed based on modular design to make it easy for users to add hardware or to maintain the computer. The following sections will guide you to the simple hardware installations for the computer.

#### 4.1.1. Open the Computer

For the computer, removing the top and bottom covers is essential to open the computer and access the inside. Follow through the steps below to remove the top cover and bottom cover from the computer.

#### 4.1.1.2. Remove Top Cover

All jumpers, CPU socket, MiniCard socket, SDRAM SO-DIMM slots, and DIO ports are built on the top side of the main board. To access these components, the computer's top cover has to be removed. Follow through the steps below to remove the top cover.

#### FPC-5211-M4

This section will use FPC-5211-M4 as the installation example.

1. Loosen and remove the 6 screws of the top case from both side as shown below.

2. Carefully lift the top cover and then completely part the top and slide the side cover from the computer.

The inside of the computer comes to view.

Installation & Maintenance

#### 4.1.1.3. Remove Bottom Cover

1. Loosen and remove the 2 screws at the bottom as shown below.

3. Carefully lift the bottom over and then completely part the side cover from the computer.

The inside of the computer comes to view.

#### 4.1.2. Install CPU

- 1. Remove the top and side cover from the computer as described in <u>4.1.1.3.</u> <u>Remove Bottom Cover on page 48.</u>
- 2. Locate the CPU socket on the main board

The processor socket comes with a lever to secure the processor. Please refer to the pictures step by step as below and note that the cover of the socket must always be installed during transportation to avoid damage to the socket.

Note: Please note that, when pushing the lever down to unclip, the lever may rebound.

3. Restore the top and back cover to the computer by fastening the all screws.

# Installation & Maintenance

#### 4.1.3. Install/Uninstall Memory Modules

The main board has two memory module (DIMM) sockets. Increase memory capacity to make programs run faster on the system. The memory module for the FPC-5211 Series' SO-DIMM sockets should be a 262-pin DDR5 with a "key notch" off the centre among the pins, which enables the memory module for particular applications. There are another two notches at each left and right side of the memory module to help fix the module in the socket.

The computer has two 262-pin DDR5 SO-DIMM sockets that each socket support up to 64 GB maximum system memory. To install a memory module:

#### To install a DDR5 memory module:

- 1. Remove the top cover from the computer as described in <u>4.1.1.2. Remove</u> <u>Top Cover</u> on page <u>46</u>
- 2. Locate the SO-DIMM sockets on the main board.

3. Align the notch on the memory module with the key in the module socket.

# Installation & Maintenance

4. Pluh the module into place. Once the memory module is fully inserted into the socket, press down on the top edge of the device to latch it into place.

- 5. This way it's flat to the laptop's bottom. The carrier should snap into place with latches.
- 6. Restore the top cover to the computer.

#### To uninstall a DDR5 memory module:

1. Pull back both latches from the SO-DIMM socket.

The DDR5 memory module will be auto-released from the socket.

- 2. Remove the memory module.
- 3. Restore the top cover to the computer.

#### Installation & Maintenance

#### 4.1.4. Installing M.2 Storage Module

The computer has a M.2 M-Key socket for NvME SSD storage. This section will use a  $22 \times 80$  form factor as the installation example.

1. Remove the top cover from the computer as described in <u>4.1.1.2. Remove</u> <u>Top Cover</u> on page <u>46</u> Locate the M.2 on-board connector.

2. Insert the M.2 module into the socket by aligning the notch on the module with the small slot on the M.2 socket.

3. Insert and fasten the screw into the standoff.

#### 4.1.5 Installing Thermal Pad for RAM & NVMe SSD

1. There are two SO-DIMM RAM slots on this device. The first slot is near the PCBA side, and the sccond slot is near the Top case.

2. For the SO-DIMM slot which is near to PCBA, please place the thermal pad on the main board PCBA. After that, remove the thermal pad protection films and then install the memory.

3. Install the NVMe SSD & SO-DIMM, which are close to the top case, then add the thermal pad and remove the thermal pad protection films.

Note: When installing the NVMe SSD, make sure to place the thermal pad near the M.2 socket or SSD controller IC.

# Installation & Maintenance

#### 4.1.6. Install Wi-Fi Module

- 1. Remove the back cover from the computer as described in <u>Section 4.1.1.3.</u> <u>Remove Bottom Cover on page 48</u>.
- 2. Locate the M.2 E-Key socket for wireless module.

3. Prepare the Wi-Fi module kit. The module is a **M.2 E-Key** socket form factor, with two MHF connectors, one is "MAIN", and the other is "AUX".

Two MHF connectors, one is "MAIN" (marked 2), the other is "AUX" (marked 1).

4. Have the RF antenna. The antenna has an SMA connector on one end and an MHF connector on the other.

5. Connect the RF antenna's MHF connector to the Wi-Fi module's main connector marked 0. If you are going to connect a secondary antenna, connect it to the connector marked 1.

#### Installation & Maintenance

6. Plug the Wi-Fi module to the socket's connector by a slanted angle. Fully plug the module, and note the notch on the wireless module should meet the break of the connector.

7. Press the module down and fix the module in place using one screw.

8. Locate the SMA antenna holes on front panel. Remove the plastic plug to make an antenna hole. Keep the plastic plug for any possible restoration

in the future.

9. From the other end of the RF antenna, which is an SMA connector, remove the washer and the nut. Note the SMA connector has the form of a threaded bolt, with one flat side.

10. Pull the SMA connector through the above mentioned antenna hole. Note to meet the aforesaid flattened side with the antenna hole's flat side.

11. Mount the washer first and then the nut to the SMA connector. Make sure the nut is tightened.

# Installation & Maintenance

12. Have the external antenna(s). Screw and tightly fasten the antenna(s) to the SMA connector.

13. After completing the required hardware installation, assemble the computer by performing the proceeding steps in reverse order.
#### 4.1.7. Install Internal SATA Storage Device

The computer supports two 2.5" SATA storage devices to work inside the computer for RAID. The following will guide you to install two SATA HDD/SSD.

1. Find the HDD/SSD brackets. Loosen the screws as marked in the illustration below and take the bracket out. Then dismount the bracket from the computer.

2. For the 1st storage bracket, slide the HDD/SSD storage device into the bracket.

3. Fix the storage device in place by fastening the four screws of the bracket.

- 4. If you are going to install the 2nd HDD/SSD storage device, slide the storage device into the bracket and fix it in place in the same way.
- 5. Restore the HDD/SSD bracket to the computer.

#### 4.1.8. Install MXM3.1 TYPE A/B GPU Cards

To install a PCI or PCI Express card:

- 1. Remove the top cover from the computer as described in section <u>4.1.1.2</u>. <u>Remove Top Cover</u> on page <u>46</u>
- 2. Locate the MXM3.1 TYPE A/B GPU socket for GPU card.

3. Install the graphic card into the computer correctly.

**Note**: Only specific component can be installed, please check the datasheet in advanced.

#### Installation & Maintenance

a. Align the graphics card notch with the slot on the board and push the graphics card into the slot until firmly inserted.

- b. Then tighten the screws to secure GPU card.
- 4. Remove liner papers on the top cover.

5. Restore the top cover to the computer.

### 4.2. Wire DC-in Power Source

#### 4.2.1 Automation Mode

Follow the instructions below for connecting the computer to a DC-input power source.

**Warning** Only trained and qualified personnel are allowed to install or replace this equipment.

- 1. Before wiring, make sure the power source is disconnected.
- 2. Find the terminal block in the accessory box.
- 3. Use the wire-stripping tool to strip a short insulation segment from the output wires of the DC power source.
- 4. Identify the positive and negative feed positions for the terminal block connection. See the symbols printed on the rear panel indicating the polarities and DC-input power range in voltage.
- 5. Insert the exposed wires into the terminal block plugs. Only wires with insulation should extend from the terminal block plugs. Note that the polarities between the wires and the terminal block plugs must be positive to positive and negative to negative.
- 6. Use a slotted screwdriver to tighten the captive screws. Plug the terminal block firmly, which wired, into the receptacle on the rear panel.

#### Installation & Maintenance

#### 4.2.2 Vehicle Application Mode

Follow the instructions below for connecting the computer to a vehicle power source.

- 1. Make sure JACCON1 jumper is open for vehicle power mode. (Refer to <u>Section 3.2. Pin Headers and Connectors on page 25</u>)
- 2. For vehicle application, DC power Input wiring pin configuration is as below. Please connect the Acc pin with your car Acc, and the device will be activated when you turn your ignition key to Acc.

## 4.3 Wall Mounting

Prepare the wall mount kit and a screwdriver for wall mounting. Follow the instructions below:

1. Align the screw holes of the wall mount bracket with the ones of the main unit. Using the M3 screws included in the wall mount kit, fasten the wall mount bracket to the computer's case.

2. When the bracket is attached, the computer can be hanged on the wall as the way you want. The wall mount bracket dimension is shown as below:

This page is intentionally left blank.

The BIOS Setup utility for the FPC-5211 Series is featured by American Megatrends Inc to configure the system settings stored in the system's BIOS ROM. The BIOS is activated once the computer powers on. When the computer is off, the battery on the main board supplies power to BIOS RAM.

To enter the BIOS Setup utility, keep hitting the "Delete" key upon powering on the computer.

#### **Key Commands**

The BIOS Setup utility relies on a keyboard to receive user's instructions. Hit the following keys to navigate within the utility and use the utility.

Keystroke	Function	
$\leftarrow \rightarrow$	Moves left/right between the top menus.	
$\downarrow \uparrow$	Moves up/down between highlight items.	
Enter	Selects an highlighted item/field.	
Esc	<ul> <li>On the top menus: Use Esc to quit the utility without saving changes to CMOS. (The screen will prompt a message asking you to select OK or Cancel to exit discarding changes.</li> <li>On the submenus: Use Esc to quit current screen and return to the top menu.</li> </ul>	
Page Up / +	Increases current value to the next higher value or switches between available options.	
Page Down / -	Decreases current value to the next lower value or switches between available options.	
F1	Opens the <b>Help</b> of the BIOS Setup utility.	
F2	Previous values	
F9	Optimized defaults	
F10	Exits the utility saving the changes that have been made. (The screen then prompts a message asking you to select <b>OK</b> or <b>Cancel</b> to exit saving changes.)	

Note: Pay attention to the "WARNING" that shows at the left pane onscreen when making any change to the BIOS settings.

This BIOS Setup utility is updated from time to time to improve system performance and hence the screenshots hereinafter may not fully comply with what you actually have onscreen.

### Appendix A. CAN BUS Test Procedures

Users can test the CAN BUS in the Windows environment. Below is the procedure for your reference.

#### Step 1.

Users need to place the .exe file and .DLL file in the same folder for successful execution.

名稱 ^	修改日期	類型	大小
III FitCANBus.exe	2023/7/19 下午 05:27	應用程式	1,934 KB
	2022/8/22 上午 11:21	應用程式擴充	381 KB

#### Step 2.

Open the command prompt in Windows and navigate to the appropriate location. You will need to open two windows, one for sending and one for receiving—the command as below.

FitCANBus.exe COM5 1000 12345678 29 0 0 0 0 0	<< Receiving
FitCANBus.exe COM6 1000 12345678 29 0 1 10 0 0	<< Transmitting

Note: The receive command should be placed first, and wait for the data to come in, in order to test normally, otherwise it will become timeout receive.

Step 3. Execute the application program by command Example. Command line  $\rightarrow$  FitCANBus.exe COM5 1000 12345678 29 0 0 0 0 0

FitCANBus.exe  $\rightarrow$  Execute the application program file name <COM Port Number>  $\rightarrow$  It depends on the COM PORT of the computer, the examples are com5 & com6. Example:

<CAN baudRate>  $\rightarrow$  baud rate, 1000=1M OR 250=250K and so on. <CAN ID>  $\rightarrow$  format of CANID. Example: 12345678 , CANID with hex format

Note: If Filter and Mask set to 0 0, that means no filter, if you want to set specified CANID, you can give the CANID as FilterPattern, Mask set to ffffffff for 29 bit, set to fff fort 11bit, up to 15 filters.

Appendices

#### Step 4.

When the test is completed, a text file will be in the same folder for the record. This file will include the date, sampling rate, and time consumed.

### Appendices

# B.2. Dry Contact DI with NPN / PNP connection

PNP

NPN

# Appendix C. 8-bit Opto-Isolated DO Signal Connections

### C.1. DO Connection diagram

When an isolated output channel is being used as an output channel, if an external voltage (maximum 24V) is applied, the current will flow from the external voltage source to the system. Make sure that the current through each out pin does not exceed 100 mA.
